PROPOSALS

For Publishing, by Subscription,

THE COMPLETE WORKS OF

SIR WALTER SCOTT:

With a Biography: being the first American (and only) edition which contains the Author's last additions and illustrations, arranged upon their respective pages.

A COMPLETE and uniform edition of the various productions of the great 'Minstrel of the North,' is a *desideratum* with the American public. No library is complete without them, and no edition extant is sufficiently compact for such a repository; while the endless number of editions, *without any uniformity in size*, heretofore published, besides being exceedingly cumbrous, are far too voluminous and expensive to be within the reach of the great majority of readers. The undersigned therefore announce, that they have now in press, and will issue, an edition of the Works of Sir Walter Scott, which will embrace all his Poems, Novels, Histories, Biographies, and Fugitive Compositions, as well as the Biography and Private Correspondence, now in the course of publication in England, under the superintendence of Mr. Lockhart.

1st. In Parts: each Part embracing as much matter as is contained in two volumes of the present editions of the Waverley Novels, which will be put at the unprecedented low price of THIRTY SEVEN AND A HALF CENTS.

2d. Two parts will appear each month; but should the publishers find the work to meet the patronage they anticipate, FOUR PARTS will be issued monthly.

3d. The whole will be completed in *seven volumes*, or *forty eight parts.*

The paper on which the above is now printing, has been made expressly for the purpose; the present parts may, therefore, be considered a fair specimen, in every respect, of the whole work; but, should dissatisfaction arise with any subscriber, owing to an inferior article being offered, he may discontinue at any time, and have the amount paid returned.

Note.—The publication of the first volume is deferred until the receipt of the Biography, Private Correspondence, and the New Edition of the Author's Poetical Works, with 'contemporary criticism—various readings—and correspondence with some of the most eminent persons of the time when the Poems first appeared,' now in the course of publication in England.

Volume I will be ornamented with an excellent Portrait of Sir Walter Scott.

DAILY PITTSBURGH GAZETTE.

FRIDAY AFTERNOON, OCTOBER 25, 1833.

FREIGHTS TO LOUISVILLE.—In an editorial article, yesterday, we stated the average rate of freight to Louisville, in the spring of the year, and at other times, when the river was full, at from 31 1-4 to 37 1-2 per hundred pounds.—One of our most intelligent commission merchants assures us that this was too high. He says that, in the spring, iron is transported for 20 cents per hundred, and that the average rate of merchandise is from 31 to 33 cents per hundred. This of course makes our argument still stronger in favor of this rout.

☞GALE ON LAKE ERIE.—The editor of the Times has politely furnished us with an Extra, from the office of the Buffalo Patriot, from which we take the following account of the late gale.

Buffalo Patriot, Extra, Saturday, October 19.

GALE ON LAKE ERIE.

On Thursday last, at about 11 o'clock, A. M., a strong breeze sprung up from the east, and soon hauled to the northward and westward, followed immediately by a heavy storm of rain, increasing to the greatest gale ever experienced on the Lake, and continuing with unabated fury until 2 o'clock yesterday morning, blowing down chimneys, and sweeping off the roofs of buildings. The fine block of brick stores of Bennett, Macy, & Williams, just finishing on the Terrace, were stripped of their heavy tin roofs, or rather, they were torn up, and thrown into a confused mass; the heavy tin roofs of the two large stores being finished on the Flats, belonging to Richard Sears, were lifted off, and fell, with a tremendous crash, upon Main street.

The water flooded the Flats, and vast quantities of wood, staves, lumber generally, &c., were floating in confusion about the canals, slips, and creeks, and a number of docks torn up.

The steam boat Enterprize, driven back, came into the harbor about 4 o'clock, P. M., in good order, and several other vessels have arrived safe.

The schooner Alert, Captain Randall, is ashore on the beach, under the lee of the lower pier.—Cargo not much damaged, and vessel will be saved.

Schooner Eagle, Capt. Wilkeson, aground inside the pier, loaded with merchandise for Maumee.—Is now unloading, and will probably get off.

Several vessels broke from their fastenings, but were secured.

Schr. Louisa Jenkins, Captain Royal Pember, loaded with merchandise for Huron and Sandusky, from Smith & Macy, owners, which had left a few days previous, and was driven back from Grand river, made a second attempt on the day previous to the gale, was driven in under point Abino, and the following letter is an extract from her Captain: "After a severe night, the Louisa Jenkins brought up on point Abino, about one mile from the point—the seas were so tremendous that they broke over the vessel—she was unmanageable—gafts both broke—her mainsail split—lost her jib—so full of water we could do nothing with her—our only resource was to run her ashore—passengers and crew all safe. She is high and dry on the beach. We are landing the cargo—water four feet in the hold. The sea was so heavy that it cleared our decks, and broke through our companion way. I could not fetch up around the point. I kept the helm, and shaped my course for Buffalo, which was most of the time east. The weather being thick, the first land we made was to the leeward of the point. Every thing off deck long before she fetched up on shore. The vessel is not much injured. There is one vessel ashore at Kettle Creek. I saw several others out, but do not know their fate." The cargo was very valuable of Dry Goods and Groceries; and Messrs. Smith & Macy, with their usual promptness, have despatched the schr. President to her relief. Cargo partially ensured, but no insurance on the vessel.

The steam boat Niagara, Capt. Stanard, arrived this morning, reporting that she passed the steam boats New York, Uncle Sam, Pennsylvania, and Penn, between Cunningham's island and the mouth of Detroit river, the day previous to the gale. Of course they are safe. Likewise, passed steam boats Michigan and Peacock, just before the blow, near Grand River, where they must have made themselves safe. Likewise, the schr. Michigan, high and dry, six or eight miles below Detroit river. Likewise, the steam boat Sheldon Thompson, the schr. Antelope, and two schooners from lower Lakes, safe in Erie harbor, where the Niagara took shelter.

Schooner Young Lion, Capt. Kennedy, has arrived, leaving Cleveland on the morning of the blow, scudding as long as possible, and laying to all night under bare poles, the sea making a continual breach over her, from stem to stern—sail split—but come in with flour to Smith and Macy, with only the loss of ten barrels.

Schr. America, Capt. Foster, driven back, throwing over deck loading, is in port, with all hands exhausted.

Schr. Phillips, Capt. Davison, driven back, with boat and stern stove.

Schr. Young Amaranth, Capt. Ransom, driven back, with the loss of both jibs, jib boom, bowsprit sprung, and one anchor broke. Reports 3 schrs. at anchor at Long Point, where she lay during the night, one the Marie Antoinette, and the others supposed to be the Globe and Neucles. Likewise three other schooners, as having anchored there blown off during the night, names unknown.

British schr. Recovery, Capt Fellows, dragged and slipped her chains during the night, off Erie, come in safe with loss of chains and anchors.

The Bolivar, Capt. Rice, driven back, with the loss of part of her deck cargo—mainsail split.

Two vessels are reported ashore between this and Dunkirk.

The vessels that had their sails split, are literally covered with lint.

The steam boats Henry Clay and Enterprize, left this port this morning, with 800 passengers and baggage.

P. S.—The steam boat Superior is reported as safe, and several sail in sight.

COMMUNICATED.

☞ The Vestry of Christ Church, Allegheny, have unanimously invited the Rev. WILLIAM HILTON to the Rectorship of that Church, in the place of the Rev. S. K. Brunot, deceased—he has signified his acceptance of the invitation, and will enter on the duties of his charge on the first Sunday in December. Oct. 25.

Responsibility of Stage Proprietors.—In a recent case in Cincinnati, the court instructed the jury that it is the duty of stage proprietors to provide good and sound carriages, safe horses and sound harness; and not take more than a reasonable load, and to see that well stored; in the night season to carry lights; and with all these they are accountable that the driving is proper and skilful. If the injury complained of in this case arose from the neglect or fault of the proprietors of the stage, the defendants, in any one of these particulars, they are liable.

From the N. Y. Mercantile Advertiser, of Oct. 21.

FROM CARTHAGENA.

The packet brig Athenian, arrived yesterday from Carthagena, having left that port on the 1st instant. We are favored with the following extract of a letter from an American gentleman, of great distinction, resident at the capital of New Grenada, to S. E. Burrows, Esq., of this city, by which it appears that a serious conspiracy had been formed to annihilate the present government, which, however, had been effectually suppressed.

"BOGOTA, Sept. 1st, 1833.—The principal news I have to communicate, is the particulars of the late conspiracy, which was more extensive than at first anticipated.

"The object of the conspirators was not only to murder President Santander and his cabinet, but also to massacre every foreigner, without distinction; and I have no doubt had they succeeded, it would have been a most bloody revolution. But I trust the danger is over; the trials are closed, and in a few days we shall know the fate of the conspirators.

"The commissioners from Venezuela have reached this place, and those from the Equator are daily expected; so that I hope, in a few months, our citizens will have some chance to have their claims on the government of Colombia settled. The division of the debt will be in proportion to the population of the people in the various states of New Grenada, Venezuela, and Equator."

Last week, we made some extracts from Mr. Finch's Travels in the United States and Canada. Among the other passages which we have margined, are the following, that do him credit.—*National Gazette.*

"*Hall of the Representatives, at Washington.*—This hall, which on a week day is the arena of political debate, and the theatre of angry discussion, is converted into a church for the worship of Almighty God. Members who, a few days previous, were directing towards each other looks of hostility, now kneel in worship. It seems as if United America was here appearing before her God, and offering a pledge that, in her political career, she would reverence His laws."

"It is the fashion for ladies to attend the Supreme Court at Washington, when any interesting cases are to be argued, and their entre' produces some sensation in the court. But the most strict order and decorum are observed, the most profound silence. In the questions that arise between the States, they send their most eminent counsellors to argue the cause, and frequently the same persons are members of Congress. They have every motive to exertion that can stimulate the human mind. Before them, the highest court of judicature on the American continent—around them, the counsellors of other States, listening to every argument—the audience, consisting of senators, representatives, and strangers—the honor and interest of the State are alike concerned; and whether the palm of eloquence shall be awarded to a citizen of Virginia or Massachusetts, of Illinois or Missouri, is a question worth contending."

Superiority of the Right hand over the Left.—In speaking of the arteries which go to the hand, it may be expected that we should touch on a subject, which has been formerly a good deal discussed, whether the properties of the right hand, in comparison with those of the left, depend on the course of the arteries to it. It is affirmed that the trunk of the artery going to the right arm, passes off from the heart so as to admit the blood directly and more forcibly into the small vessels of the arm. This is assigning a cause which is unequal to the effect, and presenting altogether too confined a view of the subject: it is a participation in the common error of seeking in the mechanism the cause of phenomena which have a deeper source. For the conveniences of life, and to make us prompt and dexterous, it is pretty evident that there ought to be no hesitation which hand is to be used, or which foot is to be put forward; nor is there, in fact, any such indecision. Is this taught, or have we this readiness given to us by nature? It must be observed, at the same time, that there is a distinction in the whole right side of the body, and that the left side is not only the weaker in regard to muscular strength, but also in its vital or constitutional properties. The development of the organs of action and motion is greatest upon the right side, as may at any time be ascertained by measurement, or the testimony of the tailor or shoemaker; certainly, this superiority may be said to result from the more frequent exertion of the right hand; but the peculiarity extends to the constitution also; and disease attacks the left extremities more frequently than the right. In opera dancers, we may see that the most difficult feats are performed with the right foot. But their preparatory exercises better evince the natural weakness of the left limb, since these performers are made to give double practice to it, in order to avoid awkwardness in the public exhibition; for if these exercises be neglected, an ungraceful preference will be given to the right side. In walking behind a person, it is very seldom that we see an equalized motion of the body; and if we look to the left foot, we shall find that the tread is not so firm upon it, that the toe is not so much turned out as in the right, and that a greater push is made with it. From the peculiar form of woman, and the elasticity of her step, resulting more from the motion of her ancle than of the haunches, the defect of the left foot when it exists is more apparent in her gait. No boy hops upon his left foot, unless he be left handed. The horseman puts the left foot in the stirrup, and springs from the right. We think we may conclude, that every thing being adapted in the conveniences of life to the right hand, as for example, the direction of the worm of the screw, or of the cutting end of the auger, is not arbitrary, but is related to a natural endowment of the body. He who is left handed, is most sensible to the advantages of this adaptation, from the opening of the parlor door to the opening of the penknife. On the whole, the preference of the right hand is not the effect of habit, but is a natural provision, and is bestowed for a very obvious purpose; and the property does not depend on the peculiar distribution of the arteries of the arm—but the preference is given to the right foot, as well as the right hand.—*Bell's Bridgewater Treatise.*

We remark, in a French paper, that the proportion of the Department of Seine (Paris) to the whole population of France, is as *one* to thirty four. The total receipts of taxes for France was, in 1832, 971,317,104 fr., of which sum, the department of Seine paid 88,740,815, more than one eleventh.—The inhabitants of the other departments pay, each one, a mean tax of 27 fr. 90 c. while an inhabitant of the department of Seine pays 94 fr. 89 c.—an immense difference.

The annual consumption in Paris procures for the producers the sale of 800,000 hectolitres of wine, 50,000 do. of brandy, 12,000 do. of cider, 8,000 do. of olive oil, 60,000 do. of other kinds of oil, 1,200,000 kellogrammes of small meats, 400,000 do. small vegetables, 74,000 oxen, 8,000 cows, 76,000 calves, 80,000 swine, 370,000 sheep.—There are also sold of game amounting to 8,000,000 fr., fresh sea fish, amounting to 4,000,000 fr., oysters, 1,000,000, fresh water fish, 600,000 fr., and butter and eggs amounting to nearly 4,000,000 francs, and cheese amounting to 1,500,000 francs.

There is also consumed in Paris, 1,100,000 cords of fire wood, 4,000,000 faggots, 1,800,000 hectolitres of charcoal, and 550,000 sacks of meal.—There has no computation been made in the above account of the consumption of the various materials for building, nor of the consumption of silk, cotton, woollen, linen, hemp, furs, and horse hair, nor of hides, leather, glass, and metals.

In 1820, the total amount of exports from France to foreign countries, was 450,000,000 fr., of which Paris alone furnished merchandise amounting to 47,714,284 francs. From a comparative table, published by the *Moniteur*, it appears that the average exportations from Paris during the first six months of the years 1828, '29, '30, '31, '32, '33, amounted to 32,329,720 fr., which would give an annual exportation of at least fifty millions of francs. The value of the various kinds of mechanical, chemical, and other products of Paris, is about 310 millions of francs.—*U. S. Gaz.*

The Philosopher Nonplussed.—De la Croix relates the following almost incredible instance of sagacity in a cat, which, even under the receiver of an air pump, discovered the means of escaping a death which appeared to all present inevitable: "I once saw," said he, "a lecturer upon experimental philosophy place a cat under the glass receiver of an air pump, for the purpose of demonstrating that very certain fact that life cannot be supported without air and respiration. The lecturer had already made several strokes with the piston, in order to exhaust the receiver of its air, when the animal, which began to feel herself very uncomfortable in the rarified atmosphere, was fortunate enough to discover the source from whence her uneasiness proceeded. She placed her paw upon the hole through which the air escaped and thus prevented any more from passing out of the receiver. All the exertions of the philosophers were now unavailing; in vain he drew the piston; the cat's paw effectually prevented its operation. Hoping to effect his purpose, he let air again into the receiver, which, as soon as the cat perceived, she withdrew her paw from the aperture; but whenever he attempted to exhaust the receiver she applied her paw as before. All the spectators clapped their hands in admiration of the wonderful sagacity of the animal, and the Lecturer found himself under the necessity of liberating her, and substituting in her place another that possessed less penetration, and enabled him to exhibit the cruel experiment."

WELSH FLANNEL.—*A rational reason for marrying.*—"How could you do so imprudent a thing," said a curate to a very poor Taffy, "what reason could you have for marrying a girl as completely steeped in poverty as yourself, and both without the slightest provision?" "Why, Sir," replied the Benedict, "we had a very good reason; we had a blanket apiece, and as the cold winter weather was coming on, we thought that putting them together would be warmer."

Modern *democracy* consists in supporting all the assertions of power and the acts of men in offices. Good old fashioned democracy—the democracy we have learned to respect and admire—always resisted the open or insidious encroachments of power, come from whatever corner they might.—*Alex. Gazette.*

Between London and Brighton, England, is a singular vehicle running daily. It is a small cart drawn by seven dogs, harnessed three abreast; and is enabled to keep pace with the swiftest coaches.—*Amer. Sentinel.*

Never compliment a woman on her corpulency. If she really be fat, the greatest compliment you can pay her, is to remark, in an indifferent sort of way, that she is not looking as stout as usual.

We understand, says the Miners' Journal, that an experiment was made a few days since on an inclined plane of the Danville and Pottsville Rail Road on the Broad mountain, to ascertain its practical operation; the length of the Plane being 800 feet and perpendicular height 200 feet. The ascending car which was raised by means of a decending one, passed up in the short space of ninety seconds, and without any thing to interrupt the smoothness of its ascent. It is understood that water power will be made use of on these inclined planes, which is attended with far less expense than that which is incident to steam machinery.

The tonnage filled by the total foreign commerce of Philadelphia, *inward and outward*, for nine months, ending 31st of September last—was 127,298 tons, being nearly one half of the tonnage that will have been filled by the coal trade of Schuylkill county alone, during the present season: further to illustrate the importance of this trade I will repeat an observation made by Mr. Lyon, in in his address, on the 4th of July: "The home trade not only perpetuates our independence, but it is the most beneficial of all trades; it is a maxim of political economy that 'the most profitable sales to a nation, are those made by one individual to another within the nation, for they imply a national production of two values, the value sold, and that given in exchange,' the production of these two values, is the true secret of the prosperity of the country, of the increase of our foreign commerce, and of the unprecedented advance of our commercial and manufacturing cities."—*Miner's Journal.*

The legislature of New Jersey commenced its session at Trenton on Tuesday, the 22d instant. Besides some county appointments, they will have to choose a Governor and a judge of the Supreme Court. For the former office the names of Mr. Vroom and General Dickerson are mentioned.—*Nat. Gaz.*

The Trenton Emporium contains the Opinion of Mr. Taney, late Attorney General of the United States, on the validity of the law of N. Jersey under which the Camden and Amboy Rail Road and the Delaware and Raritan Companies claim a monopoly. Several of the general maxims upon which his conclusions are founded might be successfully comba ted; but our object, at present, in noticing the Opinion is merely to cite this passage:

"It is now too well settled to be disputed, that a charter granted by a State to a company incorporated to make a road or canal, where the funds for the work are provided by individuals, is a contract on the part of the State, and the public cannot by subsequent legislation, without the consent of the corporation, alter the terms of the charter."

We should suppose that in case also of a charter granted by the general government,—such as that of the Bank of the U. States,—the *Executive* could not alter the terms according to his will and pleasure; and this *a fortiori*. Nevertheless, Mr. Taney, has just lent himself to such an act.—*Nat. Gaz.*

Wilson Lumpkin, the Union candidate is, without doubt, re-elected Governor of Georgia, over Joel Crawford, who was supported by the Nullifiers. Sixty counties from which returns have been received, give for Lumpkin 27,003, and for Crawford 26,103 votes.—Lumpkin's majority 900. The remaining 29 counties will increase this majority. Three fourths of them, according to the Georgia Courier, are expected to give majorities for him.—*Balt. Amer.*

The speech of R. H. Wilde, member elect of the next Congress, delivered at the recent dinner given to those members who voted against the Revenue, or "Force Bill," has been published in the Georgia papers. It is a curious affair for the time and the occasion.—The party was a nullification party, friendly to the South Carolina remedy, and Mr. Wilde was the only one of the members invited, who attended, and he justified his vote against the bill, on entirely different grounds. He said distinctly, that he had "never been able to bring his mind to the conclusion, that the tariff acts are plain and palpable violations of the constitution, either within the cognizance of the judiciary, or liable to be nullified by the States. He believed so still." He believed them to be "unjust, oppressive, and pernicious," but not "strictly and literally unconstitutional." His vote against the Force Bill was given from a love of peace, and attachment to the Union.—*Balt. Amer.*

We regret to perceive that nullification bids fair to be triumphant in Georgia. The returns of the election for Governor, so far as received, give a majority for Joel Crawford—the State rights, or Nullification candidate—over Wilson Lumpkin, the present Governor, who belonged to the Union party. In Savannah the majority was but small for Crawford, & in Augusta he was in a mainrity: but the returns from some of the counties show that the exertions of the nullifiers have been successful beyond any reasonable anticipation.—*Balt. Gaz.*

The Globe has announced to the public, that Gen. Jackson had determined to remove the deposits, and that nothing could stop him, "WE KNOW THAT FACT," says the official:

"We know the fact that if Mr. Van Buren, and every personal friend of the President, had united in recommending that the Deposits should not be removed, the President would have taken measures to remove them notwithstanding."

What is this but Despotism? Who dare talk of the restraint of the law of Congress, after this? What avails the useless form of a Secretary's signature, after this? If Mr. Taney had refused to sign the order, General Jackson would have removed *him*, and appointed some one else:—he would not have stopped in his frantic war upon a Bank that had *opposed his election*, if he had been obliged to take a stone breaker from Pennsylvania Avenue, to serve as temporary Secretary of the Treasury, and sign the necessary instrument of his vengeance.

And yet there are editors, holding respectable stations in society, and classed as patriotic citizens, who declare, with apparent sincerity, that General Jackson is to be praised for this act, and who commend his "energy and resolution," in setting the laws of his country at defiance.—*Albany Daily Advertiser.*

Secretaries walk *into* and walk *out of* office in such rapid succession now a days, that they must be losers in the pocket. A newly appointed Secretary winds up his home business, moves his family to Washington, hires a house for a year, at least, and furnishes it, and before he has time to look about him and feel comfortable, he is marched out of office, as unceremoniously as a soldier is drummed out of camp. We have our doubts whether an action of damages might not be sustained against the kitchen cabinet in all such cases.

It would be a good plan for the new Secretaries to *insure* their continuance in office for the same length of time that their houses are rented. The premium would probably be high, but it would be worth paying. The Baltimore life insurance company, and the New York life and trust company, might extend their business materially, by insurances of this description. We expect their thanks for this valuable hint.—*Winchester Repub.*

"*Is it Man Worship?*"—The Boston Post is the leading Van Buren and Morton paper in this State. From that paper, we take the paragraph which follows. It is the commencement of a leading article.

"One of the best things done by *our Saviour*, while on earth, was to overturn the money changers' tables, in the Temple; and of all the deeds OF HIS SERVANT, the President of the United States, none is more refreshing to the friends of the people's rights, than his close imitation of his MASTER'S MOST HOLY EXAMPLE."

Andrew Jackson, like St. Paul and the apostles, a "SERVANT *of Jesus Christ!*" Andrew Jackson imitating "HIS *master's* most holy example!" Why kissing the Pope's toe is a fool to this!—*Newburyport Herald.*

Curious Calculations.—A sovereign is about .959 inch thick, so that a thousand measure 59 inches. Hence our debt of £800,000,000 would form a cylinder of sovereigns, if laid one on the other, of nearly 745 miles in length. But if, instead of being laid on the edges, they were laid flat on the ground, and touching, they would form a line of nearly 11,048 miles, or would reach far towards half way round the globe. Again, since 1,000 sovereigns weigh 16 6,587 pounds avoirdupois, or 23,051 weigh 384 lbs., the whole debt is 5,945½ tons, which, allowing two tons to a wagon load, would require 2,275 wagons to carry it, and if they contained four horses each, and occupied, severally, about 16 yards in length, this line of loaded treasure would extend to 27 miles.—*London paper.*

The gubernatorial canvass has commenced in Massachusetts with something more than its usual force. Mr. Adams fares hard in the conflict.—The National Republicans and Jackson men are both assailing him.—*U. S. Gaz.*

INDIAN NAMES.

BY MRS. L. H. SIGOURNEY.

"How can the red men be forgotten, while so many of our states and territories, rivers and lakes, are designated by their names?"

'Ye say they all have passed away,
That noble race and brave,
That their light canoes have vanish'd
From off the crested wave;
That 'mid the forest where they roam'd
There rings no hunter's shout:
But their name is on your waters,
Ye may not wash it out.

Yes, where Ontario's billow
Like ocean's surge is curl'd,
Where strong Niagara's thunder wakes
The echo of the world:
Where red Missouri bringeth
Rich tribute from the west,
And Rappahannock sweetly sleeps
On green Virginia's breast.

Ye say their conelike cabins,
That cluster'd o'er the vale,
Have disappear'd as wither'd leaves
Before the autumn gale;
But their memory liveth on your hills,
Their baptism on your shore,
Your everlasting rivers speak
Their dialect of yore.

Old Massachusetts wears it
Within her lordly crown,
And broad Ohio bears it
Amid his young renown.
Connecticut has wreath'd it
Where her quiet foliage waves,
And bold Kentucky breath'd it hoarse
Through all her ancient caves.

Wachusett hides her lingering voice
Within his rocky heart,
And Alleghany graves its tone
Throughout its lofty chart.
Monadnock on his forehead hoar
Doth seal the sacred trust,
Your mountains build their monument
Though ye give the winds their dust.

Ye deem those red brow'd brethren
The insects of an hour,
Forgotten and despised, amid
The regions of their power.
Ye drive them from their fathers' lands,
Ye break of faith the seal:
But can ye from the Court of Heaven
Exclude their last appeal?

Ye see their unresisting tribes
With toil worn step and slow,
Onward through trackless deserts press,
A caravan of wo.
Think ye the Eternal's ear is deaf?
His sleepless vision dim?
Think ye the *soul's blood* may not cry
From that far land to Him?'

Midnight.—When the unfortunate Duke d'Enghien was awakened in his cell, at Vincennes, to be led to the place of execution, he asked the officer, who brought the order, "What do you want?"—The officer made no answer. "What o'clock is it?" "Midnight," answered the officer, with a faltering voice. "Midnight!" exclaimed the prince; "oh! I know what brings you here; this hour is fatal to me—it was at midnight that I was taken from my house at Ettenheim—at midnight the dungeon at Strasburgh was opened for me—at midnight again I was taken out to be brought here—it is now midnight, and I have lived long enough to know how to die!"

CHARLESTON, Oct. 12.

There is every appearance of returning animation to business within the city, and the early visits of country merchants, in consequence of the facilities of travel afforded by our rail road, may be calculated on.—But it is apprehended that a material check will be given to commercial transactions from the withdrawal of the Deposits in the U. S. Bank. Difficulties are began to be felt already in exchange operations with the North, drafts on that quarter of the Union having fallen within a fortnight 1-2 per cent. This must give a considerable check to the business of the place, until some mode of equal facility to that afforded by the Bank of the United States shall be supplied.

COTTON—There was a good demand for Upland until Thursday, and 17, 17 1-4 and 17 1-2 cts. for fine lots, favorite marks, were paid: but for the three last days there has been much less enquiry, and purchasers are not disposed now to meet sellers, unless at a reduction of a quarter of a cent, which not being submitted to, the market is in consequence languid. The sales down to yesterday have been 3,276 bales Upland, as follows: 75 at 17 1-2, 50, 17 3-8, 2,293, 17 1-4; 240, 17 1-8; 377, 17; 125, 16 3-4; 11, 16 1-2; and 105 bales of the old crop from 12 to 14 1-2 cents. There is nothing doing in other descriptions of Cotton.

RICE—There has been a brisk demand for this staple during the week. Prime lots will readily command $3 1-4 and are taken out of market as soon as they arrive.

FLOUR—The only inquiry for this article is for city consumption. No alteration of prices.

GRAIN—We have heard of no sales of Corn except by retail this week—the supply is abundant.

FLOUR—Philad. Balt. and Richmond, $6 50 a 6 75.

Corn 55 a 68; Oats 40.

The market is bare of Molasses. A lot of 120 hhds. thin Havana, brought 33 cts. A large quantity of Baltimore Bacon, about 80,000 lbs. has been sold during the week. Hams have brought 11 1-2 to 13, Shoulders 8, and Sides 9 to 9 1-2 cts. There is a good demand for Lard, and 1 lot of 100 kegs has brought 11 cents.—*Charleston Patriot.*

VALUABLE PROPERTY FOR SALE.

THE subscriber offers for sale his very valuable tract of land, upon Chartier's creek, about four miles from Pittsburgh, where the Pittsburgh and Steubenville Turnpike Road crosses it. The said tract contains one hundred and forty five acres of land, seventy of which are cleared, and under good fence.—The improvements upon this tract are—a good merchant mill, with three run of stones, and a saw mill, situated on a never failing stream of water, with eight feet head and fall; a stone distillery, forty feet square; a dwelling house, barn and stables.——For terms, apply to the subscriber, living on the premises.

SIX EGYPTIAN MUMMIES

In the Diamond, next door to the office of The Pittsburgh Gazette.

THE features of some of these mummies are in perfect expression—the hair of the head preserved as if now living. For the direct purpose of giving visitors, of all descriptions, that wish to see the ancients themselves, and likewise the bodies that were embalmed not less than three thousand years ago, this collection was exhibited to a numerous concourse of visitors, in the city of Philadelphia, for the space of 3 months; and next in Baltimore, in the Museum, for five weeks, where contract was only made for two weeks, and continued for five weeks by request. The inhabitants of this city, it is hoped, will call, and patronize a collection worthy the attention of the curious.

The proprietor is authorized to use the names of the most eminent physicians and professors in the city of Philadelphia, and likewise that of Baltimore.

Paper Mill for Sale.

THE Extensive Establishment, known as the Soft Spring Paper Mill, now in the occupancy of C. Lukens & Co. is offered for sale.—Its situation is both desirable and healthy, possessing local advantages superior to any mill in the west, with a spring of pure, soft water, yielding a superabundance for all purposes—propelled by an engine sufficiently powerful, and to which has recently been added an entire New Machine for the manufacture of paper. Its location is about two miles from the city, on the Eastern Turnpike. The subscribers have no hesitation in believing it offers inducements to purchasers highly advantageous.

The terms will be rendered satisfactory, and but a small portion of the purchase money required at the time of sale, with an extended credit for the residue, being determined to make an early disposal. It will be sold low. Application made personally, or by communication, to either of the subscribers, will be attended to.

TO ENGINEERS.

A CORRESPONDENT of the Subscribers, who resides in Tennessee, wishing to erect a Rolling Mill, at Louisville, Ky., Nashville, Tennessee, or some intermediate point, as may be deemed most advisable, is desirous of informing himself as to the cost of such an establishment, capable of rolling TWELVE TO FIFTEEN HUNDRED TONS OF IRON, of the various descriptions embraced in a general assortment.

As the location of the Mill is yet undetermined, a FULL PROPOSAL is not expected; we will, however, receive Estimates of the cost of the Engine and Machinery, and probable cost of the building; the Contractor to furnish ALL except the ground on which the building shall be erected. The mill to be delivered ready to go into operation. Such Estimates, expressing the terms of payment, and time required for the completion of the work, handed to the subscribers, on or before the 30th inst., shall be submitted at once, and it is presumed that the most favorable offer will result in a contract.

RIDDLE, FORSYTH & Co.

Pittsburgh, Oct. 12.

PIANO FORTES.

MR. TAYLOR respectfully announces to the citizens of Pittsburgh, that he has just received an assortment of PIANO FORTES, from the celebrated manufactory of Robert Nunns, Clark, and Co. (late R. & W. Nunns,) of New York, which he offers to the public at a fair price, and liberal terms.

The instruments of this most extensive establishment have (for quality and volume of tone, and for materials and workmanship) received the decided approbation of the most distinguished professors of this country and Europe. The manufacturers therefore feel confident in resting their claims to public patronage upon the intrinsic merits of the Piano Fortes themselves.

FLUTES.

Also, a few of 'Taylor's approved' Flutes; these instruments are well worth the attention of the Amateures of the Flute.

☞Ladies and Gentlemen are invited to call and examine the above instruments, at Cook and Schoyer's (late Sylvester's) store, corner of Wood and Third streets, where they will remain but a short time, Mr. Taylor's stay in this place being limited. Oct. 7, 1833.

LATE PUBLICATIONS.

SALE OF REAL ESTATE.

THE Subscribers, Trustees of the New Philadelphia Society, at Phillipsburgh, Beaver county, Pennsylvania, offer for sale the following property, to wit:

1 tract of land containing			330 acres
1	do	do	330
1	do	do	67
1	do	do	7
1	do	do	40
other lots, containing about			6

The above lands lie in one body, fronting about two miles upon the Ohio river—immediately opposite the mouth of Big Beaver creek, and the Beaver Division of the Pennsylvania Canal. The land is rich, and a part of it under a high state of cultivation—its location pleasant and healthy. The improvements upon the same are valuable, including the town of Phillipsburgh, late the residence of Count Leon, and the New Philadelphia Society. The town contains about 40 Dwelling Houses, now in order; some of them brick houses and two stories high. A large and spacious Hotel, a Store house, Church, a number of Shops, for mechanics, Stables, Barns, and other out houses. Also, two large new buildings, lately erected, but not yet finished, one of brick, the other of frame (the latter suitable for a manufactory) a very extensive public garden, and also fruit trees of various kinds. The property has also attached to it the right of a ferry across the Ohio, which is valuable, and becoming more so every day.

The above property is situated in the midst of a wealthy and prosperous country, distant about 28 miles below Pittsburgh, and one mile from Beaver, the seat of justice for Beaver county—and having a view for many miles up and down the Ohio, and of the country to a great distance around.

The subscribers are confident in saying that few situations could be found, presenting greater facilities to the farmer, mechanic, the manufacturer, and others—a soil rich and productive—the neighborhood abounding in coal—well timbered and watered, and, by means of the Pennsylvania Canal, and steamboat navigation, a cheap and ready conveyance to market, and a communication with other places is ensured.

The property is susceptible of divisions into farms, or for the location of new towns, or for the extension of the present one.

Should it not be sold on or before the first day of January next, it will then be offered at public sale, upon the premises, to the highest and best bidder.

PERIODICALS.

AMERICAN RAILROAD JOURNAL, and Advocate of Internal Improvements, which is designed as a repository of the accounts of the rise and progress of numerous works of Internal Improvement, in the United States particularly, and in other parts of the world generally. The work is published weekly, and forms a large octavo volume each year, of 832 pages of 3 columns each, for $3 per annum, in advance.

New York Farmer, and American Gardener's Magazine. This work is designed for the agriculturist, and will be found to contain much, both interesting and profitable, to those who cultivate the soil as a business, or merely a garden for amusement. Published in monthly parts of 32 large octavo pages, with three columns each, at $3 per annum, in advance.

Mechanics' Magazine, and Register of Improvements and Inventions. To the Mechanics of the United States—In this populous and enlightened country, almost every description of persons can obtain knowledge and amusement connected with their peculiar pursuits, through the medium of the Journal or Magazine, especially devoted to their interests. The Theologian, the Farmer, the Philosopher, the Sportsman, and even the Plough Boy, has each his Journal, where he can find a record of the passing events of the day, connected with his peculiar avocations and recreations. Hitherto, the Mechanics (who form a large and most important portion of the community) have had no Journal, to which they could turn, with the certainty of finding that information they desire, no periodical of which they could say: 'This is ours, and for us.' In the hope that the attempt to supply such a want at a price so reasonable as to be within the reach of all, will meet with your active support, the subscriber proposes to publish, on the first day of each month, a Mechanics' Magazine. It will contain a well digested selection of the most useful and interesting articles in the London Mechanics' Magazine, London Register of Arts and Sciences, Repertory of Inventions, Library of Useful Knowledge, Journal of the Franklin Institute, and other works, connected with the arts and manufactures, published in this country and in Europe, accompanied with numerous and well executed Engravings. Its pages will be open for the communications of all, and especially for those of the practical artisan, to whose interest it will be particularly devoted. The Mechanics' Magazine will contain, also, a due portion of the occurrences of the month, Scientific and Literary Reviews of Books, Anecdotes, Economical Receipts, Reports of the state of Mechanics' Institutions, and other Scientific Societies in this state and other countries. To be published monthly. Each succeeding number will contain 64 pages, handsomely printed, and stitched in a neat cover. Six numbers will form a volume, for which an index and title page will be supplied, and also a Portrait of some distinguished Mechanic, as a Frontispiece. Terms, $3 per annum, in advance.

SATIN BEAVER HAT MANUFACTORY,

NO. 6 ST. CLAIR STREET,
PITTSBURGH.

WILSON & SMITH, from N. York,

RESPECTFULLY inform the citizens of Pittsburgh and the neighboring towns, that they have commenced the manufacture of the above beautiful and elegant article, so much admired and worn throughout Europe, and the principal cities in the United States.

W. & S. beg leave to observe, that, after various experiments, they have at last succeeded in bringing this Hat to the highest state of perfection, and they can assert, with confidence, that in point of color, lightness, elasticity, durability, and general beauty of appearance, they cannot be surpassed by the most expensive Hat that is made. Gentlemen are invited to call and examine them, and judge for themselves.

DOCTOR ROBERT'S

☞ *WELCH MEDICAMENTUM.* ☜

FOR the cure of Dyspepsia, Liver Complaints Jaundice, Cholic, Fever and Ague, Dysentery, Headach, Loss of Appetite, Flatulence, Hypochondria, Hysterics, Dropsical Complaints, and Heartburn, It also prevents all Bilious disorders, and removes habitual Costiveness, Asthma, Strangury, Gravel, Rheumatism, Gout, and Impurities of the Blood.

A person who uses this Medicamentum will not require the use of the lancet, or any means of the healing art. It restores and revives the animal spirits, invigorates the system, removes nervous tremors, obtunds rheumatic and anthritic pains, and prevents their return. It cleanses the stomach of all morbid humors, which cause indigestion, acidities, headach, and lowness of spirits; cures all bilious disorders, and all cholics of the stomach and bowels, almost immediately; inspires cheerfulness; gives comfort to the dropsical; takes away palpitation of the heart; gives circulation to the blood; restores bloom to the sallow or sickly cheek, and plumpness to the meagre habit; purges without pain, and banishes all cause of fever of every kind. It acts on the stomach, that great reservoir of the human system, a diseased state of which causes all diseases. No alteration in the usual habits of life is required, but the abstaining from distilled ardent spirits.

CERTIFICATE,

From Rev. Derick Lansing, D. D., Pastor of the Second Presbyterian Church in Utica.

Utica, Jan. 6, 1830.

To Dr. Hitchcock.—Dear Sir: I have always been one of the number of those who have placed little confidence in *nostrums* or *specifics*, and for this reason, although I saw your advertisement of the Welch Medicamentum, I could not bring my mind to consent to use it. My sufferings, from indigestion, during the past summer, were so severe, as materially to affect my comfort, and my capacity for usefulness. I have reason to thank you, sir, that, on hearing of the state of my health, you kindly sent me your Medicamentum. I have taken it faithfully, and with entire success. I have not been visited with one of those turns of distress, which before were weekly periodical, since I began to take your valuable medicine. Could I receive the same relief which I have hitherto experienced, on condition of taking it for life, I should cheerfully comply with such condition. Your's, very truly, D. C. LANSING.

ANTI-DYSPEPTIC ELIXER.

ONE of the most agreeable and efficacious Medicines ever discovered for the permanent cure of those chronic states of derangement of the stomach, constituting that miserable disease called Dyspepsia.

The basis of this Elixer is vegetables, and perfectly innocent in its operation; it destroys that sour state of the stomach, the instant it is taken, and stops the morbid secretion, by giving strength to the muscular fibre of that important organ, by which means the peristaltic motion of the intestines is increased, and the costiveness obviated; a new action is given to the system, which puts an end to a train of distressing nervous sensations.

Another form of the disease in which the Elixer is admirably calculated to relieve, is the decline of fever, where the stomach will not bear the ordinary strengthening medicines indicated in such cases, it has the surprising effect of giving vigor, and restoring the natural secretions of the body, without increasing the febrile state. Not the least danger is to be apprehended from exposure to cold, while under the use of this medicine, nor will it interrupt necessary employment of the patient a single hour.

☞ A number of cases of cures performed by the Anti-Dyspeptic Elixer in the vicinity of Pittsburgh can be given.

COMPOUND SYRUP OF LIVERWORT.

A SAFE and Valuable Medicine for Coughs, Spitting of Blood, Consumption, and Liver Complaints.

Most of the medicines made use of for the above diseases are of a stimulating nature, composed generally of Resins and Balsams, in alcoholic solutions, which, although sometimes giving temporary relief, in almost every instance where they are freely used, aggravate the disease, and reduce the strength of the patient.

This article possesses superior advantages over these preparations, its action being of a tonic, invigorating and strengthening nature, thus overcoming the disease by promoting expectoration, and gradually increasing the strength of the patient, and thus, without being attended with any unpleasant effects: it also agrees with the stomach, in a cases, and is a pleasant medicine to take.

PATENT PLANING MACHINE.—The right to use this valuable machine, invented and patented by William Woodworth, and known as Woodworth's Patent Planing Machine, may be obtained on application to the subscriber for the counties of Allegheny, Butler, Beaver, Washington, Green, Fayette, Somerset, Cambria, Indiana, Jefferson, Clearfield, M'Kean, Warren, Venango, Mercer, Crawford, and Erie, in the State of Pennsylvania. That part of Maryland lying west of the Blue Ridge; all that part of Virginia lying west of the Blue Ridge, except the county of Ohio. The whole of the state of Ohio except the counties of Hamilton, Butler, and Montgomery. The whole of the state of Kentucky, except the counties of Jefferson, Boone, Oldham, Gallatin, and Campbell. The whole of Indiana, except the counties of Floyd, Clark, Jefferson, Dearborn, and Switzerland. The whole of the state of Illinois, and the territory of Michigan. Rights to use the machine in that part of the United States, named above, will be sold by the single county or in larger districts. As it is presumed that no one will purchase without seeing the machine at work, a description of it is deemed unnecessary. Should any person, however, wish to purchase, and find it inconvenient to visit the places where it is in operation, a machine will be furnished, warranted to plane, tongue and groove, and bring to an exact width and thickness, a white pine board of 12 feet long, and of any width from 1 to 14 inches, in one minute and ten seconds, or an oak board of the same dimensions in 2 minutes and 10 seconds. Machines may be seen at work in the cities of New Orleans, Washington, Philadelphia, New York, Boston, and others at the south and east, at Wheeling, Virginia, and at the saw mill of Messrs. Irwin & Herron, in this city.

Persons desiring to purchase will have the certificates of scientific and practical men who have seen it at work, in the different places in which it has been put up, forwarded to them. They give their opinion as to the great value of the invention state the time they have seen boards dressed by this machine, and describe the quality of the work as compared with that performed by hand labor.

VALUABLE PROPERTY FOR SALE.

THE Subscriber offers for sale the farm on which he lives, in Washington county, on Pigeon creek, one mile south of Williamsport, on the Monongahela river, to which there is a perfectly level road. This farm contains near 400 acres, the greater part of which is first rate land. There is on the premises a Brick Dwelling House, a Merchant mill, in good repair, a new saw mill, a stone still house, 35 by 40 feet; a salt works is also in operation, and worked to advantage; about 150 acres of land cleared and under good fence. There is on the premises three small tenements for the accommodation of families. This tract is well timbered, and abounds with stone coal and springs of water, both of the best quality.

To a person wishing to embark in a manufacturing business, and possessing capital, this would be a very desirable situation, having the advantage of both water power from Pigeon creek, and banks of the very best coal near to the works, and easy of access, and its vicinity to so navigable a river where articles of any kind are so cheaply transported to Pittsburgh.

For further particulars, apply to James P. Stuart, Merchant, Wood street, Pittsburgh, or to the subscriber on the premises.
